

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

Wintle's 'Birds of Montreal'.¹—The work opens with a descriptive and historical preface of twelve pages, followed by (pp. 1-135) a copiously annotated list of 254 species, arranged in accordance with the classification and nomenclature of the A. O. U. Check-List, the names of the higher groups being included. The character of the 'List' is sufficiently indicated by the descriptive portion of the title page, already transcribed in the accompanying footnote. This is succeeded by what is properly part two of the book, containing "Abridged Descriptions of the Birds of Montreal, specially given for the purpose of identification for persons not familiar with their general appearance," occupying pp. 137-214, the existence of which excellent feature the title page gives no intimation. These descriptions consist of about five to ten lines each, and for the most part give very well the distinctive features of the species. This is succeeded by a very full index of vernacular names (pp. 215-227), and by still a third part, also not indicated on the title page. This has an embellished title page of its own as an 'inset,' with the title, "Original Sporting Sketches, compiled by David Rennie, 1895." It is paged continuously with the rest of the book (forming pp. 229-281), but is set in smaller type. The book appears to well meet the needs of a local, popular hand book. It is well printed in rather large type, on good paper, and typographically presents an attractive appearance. It is somewhat marred by the printer's eccentricities of punctuation in connection with the technical names, but typographical errors are not numerous.—J. A. A.

Oberholser's Birds of Wayne County, Ohio.²—The list proper includes 183 species, and is followed by a 'Hypothetical List' of 82 species, which

¹ The | Birds of Montreal | By | Ernest D. Wintle, | "Associate Member of the American Ornithologists Union." | Birds observed in the vicinity of Montreal, Province of Quebec, | Dominion of Canada, with annotations as to whether they | are "Permanent Residents," or those that are found | regularly throughout the year; "Winter Visitants," | or those that occur only during the winter season, | passing north in the spring; "Transient Visitants," or those that occur only | during migrations in spring and | autumn; "Summer Residents," | or those that are known to | breed, but which depart southward before winter; and "Accidental Visitants," or strag- | glers from remote districts; giving | their relative abundance as to whether | they are *rare*, *scarce*, *common* or *abundant*; | data of *nests* and *eggs* when found, and especially | noting the species that breed in the *City* and *Mount* | *Royal Park*; also *data* of migratory *arrivals* and *de- | partures*, and other notes, all of which are deduced | from original observations made during the past fifteen years. | — | Montreal: | W. Drysdale & Co. | — | 1896.—8vo., pp. xiv + 181, with an outline map and several plates.

² A Preliminary List of the Birds of Wayne County, Ohio. By Harry C. Oberholser. Bull. of the Ohio Agricultural Experiment Station. Technical Series, Vol. I, Number 4, July, 1896, Art. xxiv, pp. 243-354.
